SINGLE SURFACE LED PHOTO THERAPY

MEDIRAY-05+

Photo therapy is treatment with a special type of light (not sunlight). It is used to treat newborn jaundice by lowering the bilirubin levels in your baby's blood through a process called photo-oxidation.

SPECIAL FEATURES:

- Effective high intensity photo therapy device based on advance LED technology to treat the critical condition
- LED Photo therapy source having wave length in between 400nm to 550nm.
- Spectral Irradiance in 35 - 40 $\mu\text{W}/\text{cm}^2/\text{nm}$ at 45 cm height.
- SMPS Power supply to prevent the equipment from voltage fluctuation and helps in less power consumption.
- The unique design of device and distribution of light intensity ensures to cover the entire treatment area i.e, 700 - 1000mm²
- Facility of adjustment of light intensity Variable in steps
- LED based display supply and control unit with treatment time and integrated cumulative hour meter.
- Having a height adjustable mechanism.and tiltable up to 90 deg.
- Epoxy powder coated frame, control box and IV rod. Heavy duty base with antistatic castors.
- Free fall protection counter balanced with locks
- Photo therapy consist of examination light.
- Facility of Over temperature safety cut out
- The irradiance ratio (min to max) on mattress from 30 - 40 %

TECHNICAL SPECIFICATION :

photo therapy machine	On Mobile Floor stand
Type of cooling	Natural cooling
Input Supply	100-240 V Ac, 50Hz.
Wave Length	400-550 nm.
Radiance	>35 - 40 $\mu\text{W}/\text{cm}^2/\text{nm}$ at 45cm
Intensity Variation in 6 hrs	<10%.
Audible alarms	<40 dB.
Patient Leakage Current	<70 μA .
Electrical Leakage Current	<50 μA .
LED Life	20,000 - 30,000 Hrs.
Adjustable Height	60" - 44".
Mobility (No. Of Wheels)	4.(2 with lock)
LCD for Time & use	Treatment time for patient + Cumulative lamp hours
Dome	Size 19"x11"
Temperature Rise	Nil.
Power Consumption	Upto 45w
